'Fresh from the gardens'

Planning, Saving, Investing

"To have AND to hold," when applied to money, does not seem to be an easy lesson for most people to learn. The word "and" is stressed because during the recent stock market slump there have been millions who have failed to do the "holding." They have emerged as losers. They have allowed the lure of speculation to divert their time and attention from their regular occupations and interests to a field of activity about which they know next to nothing. So it seems that most of us need to concentrate more on the "holding" part of our financial plan.

So writes Leroy D. Peavey, president of the well known Tabern's Statistical Organization, who, from an income-producing point of view, divides the average individual's life into roughly three parts. The first, from about age twenty to age thirty, might be called the period of preparation or getting settled. The second, from thirty to the late fifties, might be called accumulation. The third, from the late fifties on, is the age of retirement or at least of lessened earning power.

No matter how much time and money may be expended during the twenty and twenty-five years of preparation for their life work, they can never say Mr. Peavey, be independent during the last period of life unless they have made good use of those twenty-five or more golden years in the second period. It is during this period of accumulation that one's surplus must be put at least of lessened earning power.

Planning means the making and using of a budget. The budget is the floor-plan of your financial structure. Fit it to your own situation and then stick to it, instead of shoving it after a couple of trials. Of what good are blue-prints if the structure does not grow up in accordance with their specifications? And one of these specifications will be the proportion—whatever it may be—of your income that is to be set aside as savings. Another specification will be the determination to have a home of your own one day, one that eventually will be free and clear. Because it is the mortgage or other claims, it will stand between your family and distress. Life insurance and other sound investments should likewise be included.

The second watershed, "Saving," has been brought to the consciousness of the people of this generation by many years of educational effort. It has been adopted by hundreds of thousands of Canadians as evidenced by savings accounts in post offices and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to "win the war," thousands of people who never before had invested in a bond bought Victory Bonds, and thus learned the lesson of how easy it is for money to accumulate and multiply itself through interest payments. But the lesson of saving is one that must be taught to each successive generation, and there should be no slackening in the effort. It is a lesson that all parents should see their children learn early in life and continually practice, until the savings habit is formed.

When it comes to "Investing," you have the choice between invoking the almost unbelievable power of compound interest when harnessed to regular monthly savings; that is, the power of the dollar earning interest on well seasoned securities. In the first case you need no particular advice for in its operation compound interest is both tireless and automatic. In the second instance, if you are wise, you should seek the advice of the most discriminating expert. This fortunately, you can easily obtain from your own banker.

You will want to have among your investments some good sound bonds anyway, and then if your available funds permit, some of the best stock. The latter should be bought outright and never on a shorting margin. Remember this, too. It is wise to keep a part of your funds in liquid form—that is, in cash or such short-term securities as can quickly be converted into cash. Then you will be prepared for emergencies. You might need this money for a personal emergency, or for some special investment bargain in the market that had come to your attention.

The point is to put each dollar apart to work twenty-four hours a day and each day in the year, earning more income for you. Your ability to "spare" these dollars for such a proposition will lead to a surprising increase in your "earning" power; that is, your ability to say, "You can't have it all," with your own eyes the rising structure of financial independence that is going to stand you in such good stead later in life. But in order that your future income may be ready when you need it, start to build that income NOW.

The word "investment" should be broadly interpreted to include not only bank accounts and securities, but insurance policies, your own home, real estate, mortgages, and other forms of capital. Life insurance is especially important. It not only helps people to save, but it is a protection as well as an investment. Every person should carry life insurance, but, on the other hand, it is not the part of wisdom to place all your earnings in life insurance. Follow instead the practice of diversifying your investments—part in a savings account, part in life insurance, and part in sound securities. However, this advice about investing is almost valueless if it is to be only a temporary effort, or if it is to allow your investments to be frittered away through carelessness or the greed for more. Rather turn to the fundamental sources of assured income.

And, above all, turn to hard work, initiative and perseverance, as the right means of accumulating sufficient funds for your needs, rather than the purely speculative stock market in the hope of getting something for nothing. Lastly, carry out the principle that "gold-diggers with contentment is great gain," in your finances as well as in the rest of your life.

Chickens in Alaska are remnants of Adam's 100 Ape.

ZAM-BUK
End Pain, Swelling & Bland of
HEMORRHOIDS (Piles)

Re-exporting of Canadian "canned fish" from Germany to Jugo-Slavia has been reported to the Department of Trade and Commerce, and although prospects of increasing sales in your "canned" fish are not promising, it is well known brand of Canadian lobster is sold in the retail stores of Belgrade and Zagreb.

Huge Power Projects

Millions To Be Spent In Next Three Years On Hydro Development

More than \$100,000,000 will be spent in each of the next three years on power projects now under development in Canada. Although there are other plans for important building projects, none will have a more intimate bearing upon the industrial development of Canada than those now contemplated by the power industry. The present turbine installation in the Dominion averages 583 horsepower per thousand of population, a figure which places Canada among the leading countries of the world in per capita utilization of water-power. The total installation now amounts to over \$700,000,000 horsepower and an additional installation of over 3,000,000 horsepower will probably be made within the next five years. Quebec has the largest installation with an average of nearly one horsepower per person. Ontario has a total installation of nearly two million horsepower, and in 1929, the power companies in that province generated over six billion kilowatt hours, or more than one-third of the total produced in the Dominion. Manitoba has an installation worth \$10,000,000 horsepower, and Alberta, 70,000 horsepower. On the Pacific coast, large resources are available and there with a capacity of 560,000 horsepower have been installed in British Columbia.

Is Baby Teething?

Teething time is a time of worry to most mothers. The baby is nervous, fretful, feverish. His little gums are swollen, he has a bad cold, constipation, colic and sometimes convulsions set in—neither baby nor mother can sleep.

These troubles can be quickly removed by the use of one of Baby's Own Tablets containing which Mr. Louis Grubbs, Treasurer, says "I have used the Tablets for all my babies while teething and have found them a splendid medicine."

Baby's Own Tablets are by mail at 25 cents a box from Dr. Wm. Williams, Medicine Co., Brooklyn, N.Y.

Beatty Commission

Body Has Been Asked By Premier Bennett To Continue Work

The Beatty Commission, appointed to investigate the salaries of municipal and professional civil servants, has been asked to continue its work and make a survey of other branches of the service. The request for the commission to proceed further with its survey was made by Premier R. B. Bennett.

The work of re-classification of the other branches of the civil service, an extensive and comprehensive study of salaries of professional and technical officers was tabled in the House of Commons last week, but the report was not acted upon by reason of the general election and a decision for a further survey of the service.

E. W. Beatty, president of the Canadian Pacific Railway, is chairman of the commission, with George Garneau, Quebec, and Professor Walter Murray, of the University of Saskatchewan, as the other commissioners.

Checked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing mixture, or vaporizer, penetrates the passages, soothes the inflamed membrane, and behind it years of success. It is the sure remedy for every sufferer.

Expenses Are Heavy

Kanasy MacDonald May Be Granted Increase In Salary

Premier Kanasy MacDonald is likely to get a "raise" soon. A report of a select committee on ministers' remuneration states that the Premier's annual salary of \$40,000 (about \$25,000 in 1928) is in view of the fact that No. 10 Downing Street is costly to maintain and the amount of entertaining the Premier has to do is so great. The report recommends that the Premier's salary be raised to \$47,000 or about \$35,000. A report of the same committee states that the salaries of other ministers are inadequate, but expressed the fear that the present time is not the moment for readjustment.

Money has become so popular in the British Isles that while 100 tons were produced there in the last 12 months, fully 8,500 tons, valued at \$2,000,000, were imported.

HER FAT IS MELTING FAST AWAY

All over the world Kruschen Salts is spreading a glow and women who strive for an attractive, firm, five-pound figure that must fall to the Kruschen.

Here's the recipe that banishes fat and brings into bloom all the natural attractiveness that every woman possesses. Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast. Be sure and do this every morning for 7 days. It's the daily dose that takes off the fat.

Kruschen daily means that every particle of poisonous water matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood containing Nature's six life-giving salts is carried to every organ, gland, nerve and fibre of the body, and this is followed by that Kruschen feeling of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

Report On Gas Fields

Member Of Geological Survey Of Canada To Make Report On Saskatchewan

Dr. G. S. Hume, of the Geological Survey of Canada, will make an immediate survey from all available data, of the prospects of finding gas in Saskatchewan's oil fields.

He will not make any actual investigation in the field at the present time, but having visited each city interested in gas development and gathered material from other sources will make a report based on geological information already obtained by various survey parties.

The report, framed as it affects the various cities interested, will be submitted to the Dominion Government, which in turn will forward it to the provinces by which the joint committee, representative of four cities of Saskatchewan interested in the gas question, will then be put in possession of all the facts obtained.

This was the outcome of a conference held at the parliament buildings, at Regina, when Mr. Hume met five members of the Saskatchewan Government and also of the four-city gas committee.

Russian Laws On Religion

Extracts From The Russian Laws on Religious and Nationality

The publication was in fulfillment of a promise given to the Conservatives by the Labor Government last April, when groups in Great Britain and other nations were protesting against alleged religious freedom in Russia.

The white paper states a provision of the Soviet constitution providing for the separation of church and state, and of schools from church, while equally guaranteeing liberty of religious belief and freedom of anti-religious propaganda.

The white paper also states that the criminal code of the Soviet Union provides for the punishment of religious belief in schools to young children, and that under the law is punishable by a year of compulsory labor.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with Douglas's Eucalyptus Liniment.

What Post Membership The Canadian Wheat Pool now has a membership of 142,000, the number of members having been increased by more than 100,000 within the year, according to C. H. Percell, of the Canadian Press.

Twice Benefited BY SAME REMEDY

Recommend Lydia E. Pinkham's Vegetable Compound

Cobourg, Ontario—"Years ago when I had a sick father and a young lady to care for, I got some of your Compound to do my work. After some time it did me good, and I have been using it all the time. I took several bottles of your Compound and felt like a new woman."

It is the age when she needs building up. E. E. Slezman, R. R. 4, Cobourg, Ontario.

Good News For Students

World Curial Homework and Examinations For Vancouver High Schools

Curriculum of home work and abolition of examinations for Vancouver high schools is being considered by educationalists here this summer with a view to lightening school work for children and, at the same time, increase the efficiency of several high schools.

With the inauguration of the new four year high school matriculation course at the commencement of the fall term, home work will be cut in half. It is declared by principals of several high schools. Recentment against home work which has been sweeping the country in the past few weeks is steadily increasing, both among parents and teachers who declare that the old fashioned idea of giving children enough work to keep them out of mischief is not raising the standard of education. With science investigating every branch of life for the purpose of simplifying living conditions, education, it is claimed, has stood almost still in spite of the efforts of psychology experts.

Recipe For This Week

(By Betty Barclay)

GINGER BREAD

2 cups sugar
1 cup butter
1 cup molasses
4 eggs
1½ cups flour
1 tablespoon soda
1 tablespoon ginger
1 tablespoon cinnamon
1 teaspoon salt
Cream butter and sugar; add well beaten eggs and molasses. Stir dry ingredients together and mix with milk. Bake in layer cake pans about 35 minutes in slow oven or about 325 degrees Fahrenheit. Cut into squares and serve with whipped cream.

ORANGE CAMEL

6 oranges
½ cup sugar
½ cup cream
1½ cups water
Pistachio nuts
Pare oranges, removing membrane with peel; and cut crosswise, in half. Put sugar and water in a small saucepan, and boil quickly until syrup is a golden brown. Arrange layer of orange slices in glass dish, sprinkle with sugar, pour over enough of the syrup to form a thin coating over the orange; add another layer of orange and syrup; repeat until all orange is used. Beat cream until stiff, pipe lightly on the orange, and sprinkle with chopped pistachio nuts.

Many infants are infected by worms, which not only greatly diminishes their health but may cause constitutional weakness difficult to remedy. Miller's Worm Powders will clear the stomach and bowels, and restore the child to the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

Military Promotion

Western Officers Appointed To Command Of Regina and Calgary Regiments

Promotion of Major E. R. Knight to the rank of Lieutenant-Colonel, and to command the Calgary, Alberta, regiment, was announced recently by the Department of National Defence. It was also made known that Col. J. McArthur has been appointed to command of the 1st Battalion, The Regina Rifles Regiment.

Both officers have had long service in the Canadian Militia. Lieut. Col. Knight proceeded to England with the 56th Battalion, C.E.F., in March, 1916. He served in France and Belgium. Lieut. Col. McArthur was overseas with the 38th Battalion, in May, 1915. His service also was in France and Belgium.

Pioneer Mountie Dies

Peter O'Brien, 71, veteran mountie policeman of the west, died recently at Maple Creek. Since the earliest days of the police in Saskatchewan Mr. O'Brien was associated with the activities, taking part in the Riel Rebellion engagement. His service extended over 40 years.

Crude Oil Consumption

At present only about 24 per cent of our crude oil consumption is produced in Canada.

Trans-Atlantic telephone service has been extended to Yag's Island, that it is possible to talk to people within the Arctic Circle.

Minard's Liniment removes Warts, relieves Rheumatism.

ENO'S FRUIT SALT

Doctors Warn Against Drastic Purgatives

Physicians know the danger of using cheap cathartics that create a harsh, unnatural intestinal activity. They know that ENO'S "Fruit Salt" is more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that it is safe use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

Townsite Of Churchill Big Gravel Deposit

Arrangements To Be Made For Survey Of Manitoba's Seaport
Hon. Donald G. McNeill, Minister of Mines and Natural Resources, has left for Churchill, Dr. Coleman has left for McNeill to make arrangements for the survey of the townsite of Churchill's seaport. He was accompanied by F. J. Freer, newly appointed director of the lands branch of his department, and by W. Young, director of survey for the province. In The Pas they will be joined by a northern surveyor.

The townsite of Churchill, came into the possession of the province with the transfer of the natural resources, and the trip north by Mr. McNeill and his party marks the first direct step taken by the province for establishing a town which will be a permanent settlement. Plans call for making the townsite available for regulated settlement next year. No property will be sold, but will be leased for business and residential purposes.

No Cause For Alarm

Says Russia Will Not Be Factor In Wheat Exportation For Some Time

Thomas D. Campbell, of Hardin, Mont., who has been called the world's largest wheat grower, returned recently from a trip to Russia as agricultural consultant to the Soviet, and announced that it would be longer than alarmists thought before Russia was a factor in any export field.

An country's five-year program progresses, he said, the needs of the country also increase. The more she grows the more she consumes. It will be at least three years before the Soviet government is a factor in the export of grain or any other commodity. Very soon the internal needs of the country will call for 1,000,000 bushels of wheat annually, just as an example.

First Transcontinental Levels

The first Canadian transcontinental line of precise levels was completed by the Geodetic Survey of Canada in 1916.

R.C. Hydro Development

Project of developing 3,000,000 horsepower from rivers along the coast district of British Columbia is disclosed by engineers.

Government Will Take Action To Relieve The Unemployment Situation

Ottawa, Oct. 16—In 44 centres which have replied to the query of H. G. Robertson, Minister of Labor, on unemployment figures there are 122,000 people out of work in Canada, and it is estimated this number will increase to 150,000 during the winter.

Robertson gave these figures in the Employment Service Council, of Canada, at the opening of the annual meeting.

The figures he stated did not include 44, or 10 centres which were not reported for the number who were out of work in various small centres throughout the country, and in rural areas.

Senator Robertson said he considered the figures received a conservative estimate. It was not unreasonable to say, he added, that there were now 200,000 people out of work in Canada. Figures compiled on October 15, he stated, showed that out of 200,000 unemployed in Canada, 98,794, or 49 per cent, were out of work in rural areas.

The government of Canada does not propose to adopt paternalism as a policy in dealing with unemployment. It does not propose to help the people to help themselves, Senator Robertson declared.

"I do not for one moment suggest," he said, "that the present unemployment is due to any government or lack of government activity. Unemployment is not a purely Canadian problem. It is world-wide. But it is not the business of the government of Canada to solve the unemployment problem of the world as a whole. It seems to me the problem first to be faced is for the government to help the people of Canada and assist them to look after themselves."

"A proposal has just been made to the effect that if the federal government were to restore technical education it would be a great boon to the unemployed. I do not know what the government will do because the matter has not been considered. But I do know it would at least enable the unemployed man to improve his skill during the time he is out of work."

"I feel, however, that if the technical education plan as inaugurated some years ago had been carried out to the full there would not be so many unemployed today."

To the cause of unemployment the minister referred development of labor-saving machinery, particularly in the west. Then there was the question of immigration. Feeling that it was his duty to see that the people of Canada had employment before inviting others to come in the government had taken steps to restrict immigration.

A special session of parliament was being called to deal with the situation. The government proposed to pass legislation enabling it to invite the co-operation of the provincial and municipal authorities and the co-operation of the federal government with a view to providing all the employment possible as quickly as it could be done.

Daughter Born To Duchess

Birth Of Daughter To Duchess Of York At Glamis Castle

Glamis, Scotland.—The birth of a daughter to the Duchess of York was announced at Glamis Castle, the home of her parents.

The royal mother and the little princess are making highly satisfactory progress, according to an official bulletin from the gray old castle.

News of the birth was immediately flashed by telegraph to King George and Queen Mary, who are staying at their Norfolk estate of Sandringham. The baby is the fourth grandchild of the King and Queen. The others are Princess Elizabeth and the two sons of Princess Mary, Countess of Harewood.

John H. Clynes, home secretary of the Labor Government, officially attended the royal birth. He and H. R. Boyd, ceremonial secretary to the royal couple, were both at the castle to attend the birth.

Nurse Beavers, who attended the Duchess and Princess Elizabeth, was with "Her Highness." Dr. David Miles, who with Sir Henry Strimling, master London obstetrician, was at the birth, has attended the duchess since her childhood.

New Gold Discovery

Hudson, Ont.—A new gold discovery is reported from the district 40 miles west of Red Lake, and near the Manitoba boundary, and a mining expert has left for the district to investigate.

Control of Immigration

Report Of Royal Saskatchewan Commission On Immigration

Commissioner On Immigration Has Been Submitted

Saskatoon, Sask.—Main outline of the report of the Royal Saskatchewan Commission on Immigration and Settlement has already been submitted to Premier J. T. M. Anderson, of Saskatchewan, and the full report will be printed immediately on completion. Dr. W. W. Swanton, chairman, announced his findings and recommendations of the commission are expected to be made available through the press in Ottawa and at Regina, because of changes already made in immigration laws, everything possible will be done to have the report printed immediately so that it may be made available, through the press, to the members of parliament at Ottawa and Regina.

The investigation has been a thorough one. It has been conducted in all parts of the province. Since the commission was appointed to deal with the immigration problem, it has heard and personal investigations have been made by the commissioners.

Soviets To Export Grain

Large Exports Of Wheat, Rye and Oats Expected Next Month

Saskatoon, Sask.—Large exports of Soviet wheat, rye and oats are expected next month. It was made known recently, although up to the present time only small shipments of grain have been reported.

The government has declined to give out figures of exports and the amount of grain to be exported. It is thought that purchases of food and grain will be greatly increased soon.

Bandit Robs Calgary Bank

Forces Bank Teller To Hand Over Large Sum And Then Disappears

Calgary, Alberta.—Unmasked and alone a bandit walked into the Elbow Park branch of the Bank of Montreal at 12:15 noon, and at the point of a nickel-plated revolver forced the bank teller to hand over a roll of bills amounting to approximately \$7,500, then backed out of the door and disappeared.

H. H. Weyerstein, the teller, was alone in the bank at the time, the manager, N. T. Woodward being out for lunch. He telephoned the city police immediately and described the bandit as small in size, age and dress to the police.

Plans Atlantic Flight

Montreal, Que.—A trans-Atlantic flight from St. Hubert airport, Montreal to London, Eng., will be attempted by Captain Erol Boyd, retired Canadian flyer, in the famous "plane," the "Columbia," in which Clarence Chamberlain and Charles A. Levine flew across to Europe. It was announced here by J. A. O'Brien, representative of Captain Boyd, and start will be made within the next ten days or as soon thereafter as weather permits.

Oppose Shorter Working Day

Victoria, B.C.—Claiming that it has not been shown that a five-day week will either increase or spread employment, but rather that it will cause more unemployment, manufacturers of British Columbia will oppose the proposed cut in working hours according to information on the subject sent to the Victoria Chamber of Commerce.

Small Potato Crop

Toronto, Ont.—Ontario consumers will have to depend on the western provinces because of the lack of potatoes in this province.

Proposed Health Insurance

Insurance Plan Of B.C. Health Commission Proposed For A.C. Health

Victoria, B.C.—Legislation calling for a compulsory form of state health insurance will be placed before the B.C. legislature at its next session, according to reports current at the parliament buildings.

Although the royal commission on state health and maternity benefits has not yet completed its labors, which have taken its members to all parts of the province, it is expected that hearings will conclude and a final report will be ready before the session opens. The report will contain comprehensive recommendations to the legislature on which to frame legislation.

To Celebrate Victory

Six Premiers To Attend Conservative Dinner In Toronto

Toronto, Ont.—Six premiers are expected to attend a dinner here in connection with the annual meeting of the Ontario Conservative Association, November 20 and 21.

Hon. R. B. Bennett, Prime Minister of Canada, and Provincial Premiers F. B. Tomin, British Columbia; J. M. Anderson, Saskatchewan; G. H. Ferguson, Ontario, and J. B. Macdonald, Nova Scotia, and J. B. Macdonald, New Brunswick, and G. H. Ferguson, Ontario, will be present at what is planned to be a celebration of the party's victory at the recent Dominion election.

SETTLEMENT OF DISPUTES UNDER A WORLD COURT

New York.—Dispatches from Geneva to the New York Times report that the British Labor Government is envisaging announcement at the League of Nations assembly session, in September, of its acceptance of the general act for compulsory peaceful settlement.

This step is the outgrowth of signature by the British dominions of the so-called "optional clause," binding them to accept compulsory arbitration of the disputes between them. The act is an instrument of ratification to the optional clause, the last of the dominions to do so, was deposited recently.

It has been reported that the general act, signed by the dominions, is the signature of the general act in September, in the same way that they signed the optional clause last year.

Thirty states, or more than half the league's membership, have now signed the optional clause. The only three have bound themselves by the general act. These are Belgium, Denmark and Norway. The French Chamber of Deputies approved it in June, but the senate has not yet acted.

THE KING'S DOCTOR

Lord Dawson, of Penn, physician to His Majesty King George V. as depicted by Miss Kathleen Shackleton, on board the Canadian Pacific liner "Empress of Australia." Lord Dawson is reputed to have the finest doctor's hands in England, and has the fine features and eyes sometimes recognizable in the King's portrait.

He is looking forward to his flat night of the Rockies and later is going to disappear and take a real holiday out West. A ranch is his ultimate destination.

PROMINENT MARINER

Major Fred Richardson, president of the B.C.R.A., who did some sensational shooting at the rifle meet held at Long Branch, Ont. He was the only man to score a possible on the 500-yard range, winning the lieutenant-governor's match with 118 points.

Major Fred Richardson, president of the B.C.R.A., who did some sensational shooting at the rifle meet held at Long Branch, Ont. He was the only man to score a possible on the 500-yard range, winning the lieutenant-governor's match with 118 points.

Major Fred Richardson, president of the B.C.R.A., who did some sensational shooting at the rifle meet held at Long Branch, Ont. He was the only man to score a possible on the 500-yard range, winning the lieutenant-governor's match with 118 points.

Major Fred Richardson, president of the B.C.R.A., who did some sensational shooting at the rifle meet held at Long Branch, Ont. He was the only man to score a possible on the 500-yard range, winning the lieutenant-governor's match with 118 points.

Half a Million For Roads

Quebec, Que.—The sum of \$500,000 was voted by a special order-in-council by the provincial government at a cabinet meeting for the use of road construction. This sum was added to the regular highway budget of \$12,000,000 and will be used in road building throughout the province, where the unemployment situation is most serious.

Victory Over Reds

Hankow, China.—Chinese press dispatches said Chiang Kai-shek's troops scored a crushing victory over Communists in the western part of that province, killing 50,000 Reds and capturing 2,000 rifles.

After considerable tinkering, Parsons was able to start thinking, but in getting down he slipped and fell into the whirling blades of the propeller. The engine and propeller are situated overhead.

Montreal, Que.—A daring and spectacular hold-up was staged here when two armed bandits held up the employees of the Bank of Montreal, at 4137 St. Catherine Street, East, and a customer, and escaped with \$2,950 of the bank's funds by commandeering a passing taxi-cab.

In his hurry, however, the bandits overlooked a "warning" sign on a shelf in the teller's booth.

Elevator Destroyed By Fire

Winnipeg, Man.—Damage estimated at \$75,000 resulted when fire razed the Assiniboine Grain Company elevator in St. Boniface, across the Red River from Winnipeg. The structure was valued at about \$60,000 and it contained 50,000 bushels of barley, property of Wiley, Low and Company, grain merchants. Insurance covers the damage. It is stated.

Yacht Wrecked Off English Coast

Commodore King and Five Others Lose Lives When Vessel Goes Ashore

Foray, Cornwall, Eng.—The 23-ton yacht "Islander," wrecked upon the jagged rocks of Lantivet Bay in a violent storm which pounded the English south coast, carried Commodore King, Douglas King, a prominent member of parliament, and five other men to death.

"Great waves pumpled the vessel," the Commodore King, who had chartered the "Islander," August 9, for a vacation cruise, were Commander Searle, of Berwick-on-Tweed; Surgeon Captain A. E. Bradley, Dunsmuir, Essex; Captain Glazebrook, of Bishop, Stortford; Harry Lucas, captain of the yacht, and his 17-year-old brother, Walter.

The yacht, which was owned by Lieutenant-Colonel John H. Diggle, had been participating in regatta of the Royal Yacht Squadron along the English south coast. When the boat reached Lantivet Bay, it encountered the storm and piled up on the numerous rocks of the bay.

Great waves pumpled the craft as it perched on the jagged boulders and soon went to pieces.

Drive On Labor Party Started By Churchill

Minister, Kent, Eng.—A plea for unification of the Conservative party in an effort to arouse the party's supporters and oust what he termed "this wretched Socialist Government" was made by Hon. Winston Churchill yesterday in the House of Commons.

Personal and sectional aims should be put aside to avert the decline and fall of the British Empire, the former chancellor declared. He never would have believed could decline so rapidly as they have done lately.

Mr. Churchill devoted much of his ammunition to an attack upon the way the MacDonald Government has been handling the Indian situation, particularly the way in which the Partition tribesman had come down out of the mountains and were "molested and insulting a famous city" with a large garrison of British and Indian troops.

"Such a lamentable spectacle would have been impossible in former times," he exclaimed. "It would almost seem that the same spirit of defeatism in high places which is so rapidly throwing India into chaos has paralyzed military action at Peshawar."

The former chancellor, who referred to Mahatma Gandhi as "this maledictory fanatic," declared that no proposal of dominion status for India would pass even the present councils of the Government. While saying this, he reaffirmed the "inflexible resolve of Great Britain to aid the Indian people to lift themselves increasingly for the duties of self-government."

He deplored the exclusion of Sir James Macdonald, who served on the recent parliamentary commission to India, as chairman for the coming round table conference, and pressed the conviction that the result of this conference would be "confusion were contemplated."

The former chancellor, who has engaged in many words duels with Lord Philip Snowden, the Labor leader of Great Britain, said he was unhappy about bad trade and unemployment. He put his views of the Conservative program briefly, asserting that the fall of the Labor Government would restore confidence in Britain and end the danger from Britain abroad.

"Industry will be stimulated by a tariff," he said. "Agriculture will be protected by a guarantee. The dole will be purged from abuse and impotence and we shall bear out our part in the general revival of national and imperial strength."

Canadian Automobile Trade Is Hard Hit By New Zealand Ruling

Salvage Abandoned Planes

Two Planes Of McAlpine Party Are Recovered After Enduring Storms Of Last Winter

Edmonton, Alberta.—Beating the Arctic again, Canadian fliers and airplanes have triumphed in a far northern test.

A little over a week ago, two McAlpine party was forced to abandon two monoplanes, forced down by fuel shortage, on lonely Dease Point on the Arctic coast, late last autumn. The second act was while the machines remained through an Arctic winter, enduring storms of whose magnitude none can tell. The final act, just completed, was continued in the salvage of the machines.

One of the monoplanes was the property of Dominion Explorers, Limited. A little over a week ago, two McAlpine party was forced to abandon two monoplanes, forced down by fuel shortage, on lonely Dease Point on the Arctic coast, late last autumn. The second act was while the machines remained through an Arctic winter, enduring storms of whose magnitude none can tell. The final act, just completed, was continued in the salvage of the machines.

Under the former rate, which applied to Canadian motor cars, the tariff on foreign cars was 20 per cent on the first \$1,000 and 15 per cent on the value over that amount. Under the new rate, the rate was increased to 21 1/2 per cent up to \$1,000, and 16 1/2 per cent on the remainder.

The Western Canadian Airways machine will undergo a thorough examination at McMurtry to determine if a complete overhaul is necessary.

Grow Grain At Churchill

Wheat, Oats and Barley Can Be Successfully Grown At North Hudson Bay Railway

The Prof. Man.—Wheat, oats and barley will be successfully grown at Hudson Bay. The prediction made here recently by Dr. A. Brown, of the Food Research Institute, was confirmed by Dr. Brown, who has just returned from a trip on the Hudson Bay Railway.

Dr. Brown, who is supervisor of demonstration farms in western Canada, declares that Hudson Bay climate is not adverse to grain growing. With proper cultivation and good soil, grain will mature well at Hudson Bay.

The official inspection of the first plot of grain to be grown at the Hudson Bay port. They did not face very much in the way of frost, and lack of good soil, but Mr. Brown states that the experiment was successful. He said that the wheat at a height of 18 inches, but it isn't expected to ripen because it was sown late. Alaska wheat has made a fair showing while Trent barley has a good chance of ripening.

However, garden produce, such as radishes and lettuce, were raised successfully at Churchill this season. Potatoes did not fare well.

W. Wood, of the railway construction department of the C.N.R., was responsible for the grain-growing experiment at the Hudson Bay port. Grains have matured well at several points along the Bay Railway this year, Mr. Brown reports.

Disease Is Spreading

Infantile Paralysis Causing Considerable Alarm In Ontario Centres

Toronto, Ont.—Infantile paralysis, the dread disease now spreading throughout Ontario, is to be one of the chief topics of discussion at the British Medical Association convention to be held in Winnipeg, Dr. Scott Stevenson, representing the British Medical Journal, stated here.

That the disease is slowly spreading is shown in latest reports from a boy, Joe Wightman, Bowmanville, succumbed from the effects of the disease, and there are still four cases in the hospital here.

In this city 32 were reported up to today, and although all appeared of the mild type, warnings have been issued to the parents of these children to watch for symptoms in their children.

Trade Is Hard Hit By New Zealand Ruling

Ottawa, Ont.—No official decision is available on the announced decision of New Zealand to place Canadian motor vehicles and accessories on the general tariff list. The matter, it is understood, however, will shortly receive the consideration of the government.

Canada's automobile trade with New Zealand is fairly extensive, and has been growing. The exports of Canadian cars to New Zealand during the fiscal year ended March 31 last, reached a total of 10,340 with a value of \$2,500,791. During the same period, parts to the value of \$441,555 went from Canada to New Zealand. The value of Canadian automobiles exported by Canada to New Zealand during the preceding fiscal year was \$1,787,504 and parts \$388,473.

With a view of ascertaining just what general tariff it is proposed to apply to Canada, the Department of Finance is in communication with New Zealand. The New Zealand Government has recommended a tariff, the general rate on foreign cars being increased from 50 per cent to 56 1/2 per cent, up to \$1,000 in value, and from 42 1/2 per cent to 48 1/2 per cent over \$1,000. There is some uncertainty as to whether the old or new general tariff will be applicable to Canadian exports.

Under the former rate, which applied to Canadian motor cars, the tariff on foreign cars was 20 per cent on the first \$1,000 and 15 per cent on the value over that amount. Under the new rate, the rate was increased to 21 1/2 per cent up to \$1,000, and 16 1/2 per cent on the remainder.

The Western Canadian Airways machine will undergo a thorough examination at McMurtry to determine if a complete overhaul is necessary.

THE TALKIES

COME TO TOWN

This week a new kind of entertainment comes to Bassano, and comes to stay. It is the talking pictures. For want of a better word pictures in which talking, singing, and other sounds are reproduced in synchronization with the scenes on the silver screen are called "talkies." An effort was made to coin a word that would be more artistic and at the same time convey the full meaning of talking pictures, but "talkies" they are.

So the talkies have come to town. Introduction of this new form of entertainment puts Bassano on a level with those progressive towns in the province that are keeping pace with the progress of the times.

Much credit is due P. Ubertin for bringing the talkies to Bassano. He suffered a heavy loss by fire last March when his theatre burned just when he was about to launch out on talking picture entertainment. He has displayed admirable initiative and industry in the face of many difficulties in opening a new picture theatre, and in introducing the latest innovation in screen entertainment. We offer him our congratulations and wish him success.

THE LAKE MINNEWANKA FIGHT

What is going to happen in Lake Minnewanka? That is a question the answer to which is highly important to the people of Alberta, especially the people of southern Alberta who are supplying electrical energy by the Calgary Power Co.

This pretty little lake, nestling in the mountains a few miles from Banff, is a very popular place in the national park. And the fate of Lake Minnewanka, should its waters be raised as proposed by the Calgary Power Co., to provide additional water storage for power development, is the subject of much debate in Banff, Calgary, and in other cities in the west.

Those who are opposed to the water storage scheme say that it will mar the beauty of the lake and destroy its value as a mountain attraction. Those who favor the plan say it will be of great benefit as an insurance against power shortage, and that no great injury to the beauty of the lake will result.

The water storage scheme would benefit Bassano indirectly as we get our electrical power from the Calgary Power Co., and our water supply from the Bow river which is fed by the waters of Lake Minnewanka. In seasons of low water the increased storage of Lake Minnewanka would be turned into the Bow river, maintaining a normal output of power and a normal level of water.

The Bow river and Canyon is opposed to the scheme. In the last issue of the paper the editor says in part:

"The farthest view taken by some people in Banff that it would create a payroll for a few months is past consideration. Little consideration is given as to what it would mean in many years if we had no lake resort at our door. Minnewanka today is perhaps our biggest asset, and every citizen in Banff should register a protest against any attempt to turn it over to the Calgary Power Co. or to any other company to develop as a power site."

SPRING NIGHT

(by Wilfred J. Funk)

Spring was kind to us that night;
 She sifted all the air with light;
 She put candles in the sky,
 Hung her golden lanterns high,
 Tucked the misted veil
 Of the wind beneath her chin,
 Played low melodies that we
 Trembled at in ecstasy;
 She spread sweet scents everywhere;
 She put dusk in Sylvia's hair;
 Love, she said, is happiness—
 She was lying, though, I guess.

Suspended Oracle
 "Have your parents' given their consent to our union?"
 "Not yet. Father hasn't expressed his opinion yet, and mother is waiting to contradict him."

Victim of Error

NIGHT VAUDEVILLE

(by Leigh Hanes)

The stars are in the balcony.
 The vaudeville of night
 Begins upon a meadow that the moon limns white.

A strip of silvery water,
 That dances into pearls,
 A willow combing ripples from her long wet curls.

A cricket's quick scintillate,
 A katydid strum.

And now a lyric mocking bird with sonnets to the moon—

Oh, the music and the magic
 Till the mist of morning foam,
 Till the dawn turns on the daylight
 and the stars go home!

Mother's Help

Father: "Now I want to put a little scientific question to you, my son. When the kettle boils, what does the steam come out of the spout for?"
 Son: "So that mother can open your letters before you get them."

Striking a Balance

The wife had been put on the budget plan. At the end of each month she and her husband would go over the accounts together. Every once in a while he would find an item, "L. O. K. \$5." and a little further on, "L. O. K. \$5."
 Finally he said: "My dear, what is this—L. O. K.?"
 "Lord Only Knows," she replied.

Cheap Skate

She (in tears): "You've broken the promise you gave me."
 He: "Don't cry, sweetheart, I'll give you another."

Wanted, A Yawning Chum

Bore: "You know, I'm funny—always throw myself into anything I undertake."
 Pretty girl: "How splendid! Why don't you dig a well?"

Axions to Ogle

Benny Leonard has been eating robust howls with it since he quit the prize-ring. The one-time lightweight champ was called on at the opening of a beach club and after the roof-lifting ovation subsided he twitted:

"Ladies and gentlemen, I cannot sing and I cannot dance—but I'll fight anyone in the house."

Misaken Identity

"My goodness!" exclaimed the stranger who had dropped into the police court to pass away a half hour. "The fellow caught a pretty tough lot this morning, haven't they?"
 "You're looking at the wrong lot," said his neighbor. "Those aren't the prisoners—they're the lawyers."

Expect to Finish Special Session Within Two Weeks

OTTAWA, August 27.—A session of Parliament which will set a new record for brevity is planned by the Bennett government to implement 23 Bennett's pledges to deal forthrightly with the unemployment problem.

While the date of convening the session cannot be fixed until it is known whether the return of ministers will be opposed in by-elections, it is the intention of bringing members together at the earliest possible date in September. The speech from the Throne is expected to deal only with the business of the session, which in unemployment is the decision of the Government that the entire session need not exceed two weeks in length.

Another suggestion was that a special session be called and the House adjourned until after the New Year as soon as emergency legislation was passed. This has, it is understood, been rejected in favor of the two-weeks sitting for which members will draw only the statutory allowance of \$25 per day. The legislation to be presented will include provision for cooperation with the Provinces and municipalities to forward public works which might otherwise be postponed for a year or two. A considerably expanded program of Federal public works is also indicated.

These courses are aimed at the temporary relief of unemployment. The broader policy advocated by Mr. Bennett in his campaign strives to reach basic conditions through agricultural and industrial encouragement. This hinges upon tariff adjustments of a controversial character and specific action will depend largely upon the course of events at the economic conference in London. Hence tariff adjustments, though probable, no cooperation, no countervailing duties, will not be taken up by the emergency session of the House.

Advance reports do not indicate that the Liberal party will put any impediment in the way of quick disposal of business to enable Mr. Bennett to go to the Empire Conference. In fact, Mr. King has signified his readiness to facilitate matters except where his party might find itself in conflict with the administration on principles of government.

600 MILES OF ROAD NEEDED

Before Canada can boast a trans-continental highway, about 600 miles of road must be constructed. The required road building is all west of South St. Marie, and the possible routes all lie through difficult territory. Nevertheless, in view of the sympathetic attitude displayed by the new Government at Ottawa, and the constantly increasing public interest in the trans-Canada highway project, it seems likely that construction of a road across the intervening gap may be soon started.

Officials of the Canadian Automobile Association, basing their estimates on engineering data, say that the highways that will bridge the gaps between the Soo, and the Manitoba boundary will cost \$5000 a mile in some places and \$20,000 a mile in others. In other words, for perhaps \$100,000,000 the trans-Canada highway can be made a reality. The more scenic the highway, in this case, the higher the cost. A lakeshore route around Lake Superior would be costly because it is the rock-blasted type of road which comes at the \$20,000 a mile figure. Those motorists, however, who see highways as something more than means of getting from one place to another, believe that the shore route would pay dividends in beauty and tourist attraction. Already it is possible to drive from Winnipeg to the Pacific Coast, but nobody has driven a car across Northern Ontario. When this

Wedding Bells

(Editor's Note: This was clipped from the Kansas City Star-Bay, whose editor cannot recall the source of the article, but believes it was clipped in an Oklahoma paper.)

Mr. Robert Chetway and Miss Alice Broadwin were married at noon on Monday at the home of Mr. and Mrs. J. D. Broadwin.

The groom is a popular young man who hasn't done a lick of work since he shipped in the middle of his junior year at college. He manages to dress well and keep a supply of spending money because his dad is a softhearted old fool who takes up his bad checks instead of letting him go to jail, where he belongs.

The bride is a skinny, fast little idiot who has been kissed by every boy in town since she was 12 years old. She palms like a Sioux Indian, sneaks cigarettes in secret, and drinks mean corn liquor when she is out joy-riding in her dad's car at night. She doesn't know how to cook, sew or keep house.

The house was newly plastered for the wedding, but the exterior newly painted, thus appropriately carrying out the decorative scheme for the groom was newly plastered also and the bride newly painted.

The groom wore a rented dinner suit over athletic underwear of imitation silk. His pants were held up by pale green suspenders. His mouth or eight patent leather shoes matched his state in tightness and harmonized nicely with the axle-grass pol of mean of his hair. In addition to his jacket, he carried a pocket knife, a bunch of keys, a dun for the ring and his usual look of imbecility.

The bride wore some kind of thing that let most of her legs stick out at one end and her bony upper end sticking out at the other.

The young people will make their home with the bride's parents which means they will sponge on the old man until he dies and then she will take in washing.

Poster: This may be the last issue of the Tribune, but my life ambition has been to write up one wedding, and I tell the universe, now. Now that is done, death can have no sting. Ex

Can Make Dresses Serve Another Year

OTTAWA, Aug. 27.—The styles, said by press reports to have been exhibited at the winter exhibitions in Paris, are no noticeable departure from the present styles in this country.

If women follow these fashions this winter there is no reason to expect that the quality of gowns to be used in the manufacture of women's dresses will vary noticeably because of the change in the length of dress.

According to the press reports, gowns have remained unchanged, nursing frocks are 12 inches from the floor, those for afternoon 8 inches, and evening dresses are about ankle length.

These styles are along the lines of the dictates of stylists during the spring exhibition, and are not far removed from the present preference of Canadian women.

Some Time to Wait
The editor was receiving daily poems from a young man who was aspiring to the literary field.

ONE GOOD RECIPE MAKES A COOK FAMOUS

Following is a salad that is substantial enough for a main course and easily prepared. It is particularly adaptable for the busy Sunday supper.

Two cups dried tongue, ham, or veal; 1 cup chopped celery or string beans, 3 hard cooked eggs, chopped; 1 cup canned green lima beans; one-quarter cup of gherkins, chopped; French dressing and some mayonnaise or cooked salad dressing. Mix all the ingredients. Marinate with French dressing. Moisten with mayonnaise or cooked salad dressing. Serve on lettuce leaves or individual plates.

received they were promptly thrown into the waste paper basket. The young man finally succeeded in getting into the editor's private office.

"You have not printed any of my poems," said the literary genius.

"No, not yet," replied the editor. "Well, some of them have been printed in weekly papers," exclaimed the genius, "and I want you to understand that they will be read long after Shakespeare's are forgotten."

"Quite so, but not before," said the editor.

WORLD HAPPENINGS BRIEFLY TOLD

The first member of the Canadian navy to qualify for pension is Charles J. Hill. He sailed in 1913.

The coronation of King Charles II. of Romania, has been definitely postponed, and will take place in the spring of 1931. Queen Helen plans a prolonged absence on a journey.

An order sheet of the Fascist party states that the total death, in Italy, of the earthquake of July 28, numbered only 1,475, in contrast to the previous official total of 2,142.

The Canadian Wheat Pool now has a membership of 142,000, the number of members having increased by more than 2,000 within the year, according to C. H. Perrell, of the Canadian Press.

Drastic action is end the recent hearing of silver coin in Russia has been taken by the Soviet secret police. Four men, convicted of counter-revolutionary activities were arrested and shot. They were a speculator, cashier, and two traders.

The dumping of inferior gasoline by United States companies into the Canadian market has provoked the local oil refiners. Toronto refiners have been forced to lay off from 25 to 60 men because of the dumping of this oil.

In a further effort to bring before the people of the province the great variety of the products of farm and factory, the Made-in-Manitoba Committee of the Winnipeg Industrial Development Bureau is staging an extensive publicity program.

Records at Meridian Cabin, at the entrance of Prince Albert National Park, reveal that 14,000 persons have entered Saskatchewan's playground since the opening of the present season. Park officials are confident the 1930 total will reach, if not exceed, 20,000 before the season ends.

Development of a petrified forest six miles east of Drumheller, Alberta, was discussed by the Drumheller planning commission, and a recommendation made to the Parks Development Board of Alberta that a survey of the bad lands in the vicinity be made with a view to the creation of a national park.

Girl Aviator Is Athletic

Miss Amy Johnson Is Also a Good Revolver Shot

Not many people know that Amy Johnson is a good revolver shot and a passable exponent of ju-jitsu. This famous girl flyer, who was welcomed in London, England, by thousands of admirers and several cabinet ministers on her return from a solo flight to Australia, did not look like a champion in the art of self-defence. But her looks are deceiving.

When Miss Johnson made up her mind to fly to Australia, she wondered what would happen to her if she were forced down and had to look after herself until she reached civilization. So she took lessons in ju-jitsu, and improved her shooting by constant practice with a revolver, using bottles and jars as her targets.

Not content with that she learned how to put up her fists and use them to good advantage.

Guard Against Thefts

The London Daily Herald reports that it was understood extra precautions were being taken to guard against further thefts of priceless art treasures from Buckingham Palace. Several such thefts have occurred recently, with America declared to be the chief market for stolen pictures.

Some of the southwestern cattle bear fruit even after three years of extreme drought.

London is to have a children's museum, containing a collection of children of all ages and races.

The Yungas Railway, of Bolivia, is erecting steel telegraph poles.

Memorial to Ben Eielson

Alaska To Pay Fitting Tribute To Her Pioneer Aviator

Alaska's memorial to her pioneer aviator, Col. Ben Eielson, will be a \$100,000 aeronautical engineering building at the Alaska Agricultural College and School of Mines, the farthest north college in the world.

The campaign to raise the fund for its erection is being sponsored by the American Legion posts of Alaska. B. Johnson, Canadian trade commissioner at Glasgow, who has returned to Canada to interview Canadian manufacturers on the possibilities of the British market.

The observance of "Canada Week" in Glasgow last year and the display and sale of samples of Canadian products in the empire marketing board set in Glasgow this year has met with considerable success and has demonstrated the great and growing preference for goods of empire origin.

To continue to take advantage of this sentiment, said Mr. Johnson, it is up to the Canadian producers never to cease in the endeavor to improve the quality of their products and get prices down to competitive basis.

Mr. Johnson has been Canadian trade commissioner at Glasgow for the past nine years, previous to which he was in charge of the Canadian trade office at Rio de Janeiro, Brazil. His tour of Canada will take him to the principal manufacturing and industrial centres in the Dominion.

Western Fish Hatcheries

Distribution Of Fry For 1930 Season 28 Per Cent. Higher Than In 1929

Distribution of whitefish fry from the Prairie Provinces hatcheries of the fish culture division of the Dominion Department of Fisheries, for the 1930 season, has been over 28 per cent. larger than the 1929 output, being 217,114,000. The fry have been distributed in the free swimming stage, in the waters of Manitoba, Saskatchewan and Alberta. The four western hatcheries, all of which are at Cull Harbor, Man.; Winnipegosis, Man.; Fort Qu'Appelle, Sask., and Lesser Slave Lake, Alberta.

Trade Within Empire

Inter-Empire Trade Has Seized the Imagination Of The British People

"Trade within the British Empire has seized the imagination of the British people." The British Commonwealth is in the minds of the British people far more than at any other time in the past thirty years and it is reacting to the benefit of Canadian trade," according to Gordon B. Johnson, Canadian trade commissioner at Glasgow, who has returned to Canada to interview Canadian manufacturers on the possibilities of the British market.

The observance of "Canada Week" in Glasgow last year and the display and sale of samples of Canadian products in the empire marketing board set in Glasgow this year has met with considerable success and has demonstrated the great and growing preference for goods of empire origin.

To continue to take advantage of this sentiment, said Mr. Johnson, it is up to the Canadian producers never to cease in the endeavor to improve the quality of their products and get prices down to competitive basis.

Mr. Johnson has been Canadian trade commissioner at Glasgow for the past nine years, previous to which he was in charge of the Canadian trade office at Rio de Janeiro, Brazil. His tour of Canada will take him to the principal manufacturing and industrial centres in the Dominion.

Edison Submits Questions

Youths Compete For Second Annual Edison Scholarship

The 49 youths who have gathered from all parts of the United States to compete for the second annual Edison scholarship award, grasped with a stiff questionnaire which ranged from difficult technical problems to exacting tests of general executive ability, their knowledge of history, literature, geography, government and their appreciation of the arts.

The boy selected as Thomas A. Edison's protégé to receive the special advantages which come from association with natural scientific workers of high standing, must show that he has not only good technical abilities and background, but also qualities of leadership and a keen judgment in difficult situations.

The official questionnaire which formed the chief part of the examination propounded many problems, which were clearly intended to plumb the candidate's versatility and their ability to make quick decisions in critical moments. They were allowed to select five of the native examination, consisting of five questions, several of them with three to seven subquestions, covering many problems in various fields. A note on the title page of the questionnaire advised them to "allow approximately nine minutes for each question."

Germany Under Republican Rule

The Freest Country in the World, Says Minister Of The Interior

Joseph Wirth, Minister of the Interior, for Germany, in an address in the Reichstag marking the eleventh annual celebration of Constitution Day, declared that Germany had "been made safe for democracy," although the consequences of the Versailles Treaty in many respects remained a thorn in the country's flesh.

Economic distress is acute, the federal minister declared, but the republic still stands firm in spite of sharp political divergences within, due to the excessive individualism peculiar to the German character.

Germany, under republican rule, he asserted, may boast of being "the freest country in the world."

Referring to the tendency toward a dictatorship, which, he said, was especially prevalent among the youth of the fatherland, Dr. Wirth warned the rising generation that radicalism never had achieved permanent good.

President Von Hindenburg was an interested listener to Minister Wirth's remarks.

Wheat Pool Elevators

Capacity Of Country Elevators In Saskatchewan 13 Times Greater Than In 1925

The Saskatchewan Wheat Pool country elevators, in 1929, had a storage capacity almost 13 times as great as in 1925, according to figures compiled by the Saskatchewan Co-operative Wheat Producers Limited. Country elevators of the province had a capacity of 2,870,000 bushels in 1925, and 34,569,700 bushels in 1929.

The most trouble some women have with their husbands is in getting them.

Baths of streets, shops and villages of one section of ancient Carthage are being renovated.

JUDGES FOR CANADIAN NATIONAL COMMUNITY PROGRESS COMPETITIONS

Outstanding men and women, conversant with conditions throughout the prairie provinces, who have been selected by the Canadian National Railways to judge competitions among rural communities in the three prairie provinces, who are of European origin, to be held annually for a period of five years, with three substantial prizes of \$1,000.00, \$500.00, and \$250.00 respectively, to be awarded each year in each of these provinces.

Rust Resistant Wheat

Hope Variety Of Wheat Is Grown On Farm At Yorkton, Sask.

New hard spring wheat, which has proved itself to be rust resistant, has been grown on the farm of Henry Beck, near Yorkton, Sask., under the variety name of "Hope" and has created considerable interest in the farmers and business men of the community.

Mr. Beck is the manager of Dunlop, Ltd., of Yorkton, and being interested in agriculture decided to do some experimenting with this new variety of wheat when it was first sold for four years ago.

In 1928 this variety of wheat was sold for 49¢ a bushel and so limited was the supply that only one ounce was issued each farmer of a certain district.

Planting the ounce, for which he had paid the sum of \$1.00, Mr. Beck secured a total yield of one and a quarter pounds in the fall of 1928.

The following year he sowed the pound and a quarter and the yield amounted to slightly more than one and one-quarter bushels.

Last spring he again sowed his wheat crop of "Hope" wheat and the stand at present indicates that the crop harvested will yield about thirty bushels or better.

"Hope" wheat is claimed by its originator, Edgar S. McFadden, and by its distributor, the Farmers' Seed and Nursery Company, of Fairbairn, Minnesota, to be practically immune from black stem and leaf rust, is highly resistant to blight or smut, and highly resistant to leaf scab and root rot.

Mr. Beck expressed an opinion that the stress in his patch is strong and dry and the heads non-shattering. When interviewed, Mr. Beck stated that while the crops on both sides of his acre containing the "Hope" wheat has been affected by rust there is no indications of rust in his small patch.

Area Of Manitoba

The area of Manitoba is 231,832 square miles according to information furnished by the Dominion Government. Of this area, the Topographical Survey, Department of the Interior, has made thirteen sheets of the National Topographic Map of Canada, either wholly or partially in the province. Each of these sheets covers an area of approximately six thousand square miles.

The death penalty for crime has been abolished in Denmark.

The Wheat Stem Sawfly

By Major H. G. L. Strang, Director, Agricultural Research Department, Prairie Provinces, Limited

This insect, which up till 1914 had only been the cause of a comparatively small amount of damage in Western Canada, and that, in Manitoba alone, has since that date rapidly spread over Saskatchewan and Alberta, and is now devastating crops almost up to the Pacific.

Entomologists who have given the sawfly a great deal of investigation and study are of the opinion that the sawfly is with the wheat growth to stay, and that the control of partial control of sawflies will have to be one of the operations of the wheat grower that will rank as important with any other farm operation.

The wheat stem sawfly normally lives in the prairie grasses, but of late has developed a liking for wheat, and is damaging crops and causing direct money loss to farmers more and more each year, until for the losses due to the sawfly are estimated to "run into millions" of bushels per annum in each of the Provinces of Manitoba, Saskatchewan, and Alberta.

Neglect of any attempt to control the sawfly has resulted in some years in from seventy to one hundred per cent. loss in certain districts in the West.

Entomologists, however, in the majority of wheat growing districts at the present moment, the wheat stem sawfly only operates and damages sources outside the edges of the fields, particularly around the edges of those fields that are growing a crop on stubble.

Entomologists who have given particular study to the sawfly are of the opinion, from the result of their careful investigations and experiments, that no cultural methods are really very effective in the control of this insect pest.

They have found, however, that there is a certain and definite way to minimize the damage to wheat, and in time avoid any damage whatever.

This is by the sowing of what is called a "trap crop" around the edges of the fields, and in addition around the edges for any slough or watercourses inside the fields where the native grasses can grow, because it is in these native grasses that the insect usually lays its eggs during the winter.

Oats make a very good "trap crop." The sawfly lays its eggs in the oats and eventually becomes drowned out in the stem. The oats, however, must be seeded before the wheat.

By fall the best "trap crop," however, is bromegrass, and it has been found that if a permanent crop of bromegrass is maintained completely around the edge of a field, the bromegrass strip to be from eight to ten feet wide, then the field will be almost certainly protected from sawfly damage. The bromegrass can be cut for hay or can be allowed to mature and cut for seed.

Unless some effort is made along the lines indicated, the entomologists

An Amazing Exploit

Two Young Boys Set Out To Sea In A Rubber Yacht

An "amazing exploit" by two London, England, boys, aged twelve and thirteen, who set out to sea in a rubber yacht, was revealed recently.

The boys, who lived at Hornsey, allied two motorboats with bread, meat and bottles of water, and travelled to Southsea, where they waited until darkness fell, and then, crept over the mud to the racing yacht, "Nomad," which was moored off Little Port.

Upon board the yacht, they lay down to sleep until the tide rose.

When the "Nomad" was aloft, they, all through the night, listened anxiously for anything about sailing, but they determined to go to Dover and return, so that their school mates would acclaim them as heroes.

But the plan miscarried. The yacht drifted helplessly about the Thames estuary, all through the night. Lira, constantly passed her, and the boys several times narrowly escaped being run down.

Then, in the morning, the yacht was seen drifting towards the harbor at Sheerness. Boatmen put out and were able to save her from crashing into the harbor wall. The boys were lying, helpless and frightened, in the cabin.

A waterman sailed the yacht back to Southsea. On the way, the yacht was seen by the owner, Major W. J. Edwards, of the Essex Yacht Club, and intercepted her in a motor launch.

There has been a steady improvement of the quality of cheese year by year since grading was undertaken by the Department of Agriculture at Ottawa, about seven years ago. The chief of the division of dairy produce in the department states that a new mark has been set in 1929 when 93.1 per cent. graded were found to be of first grade.

Technical School For Saskatoon

Technical education in Saskatchewan will be promoted by a new technical college in Saskatoon which will afford accommodation for a thousand students.

The United States exported 23,707,854 lbs. of false teeth last year.

Make Your Windows Pay

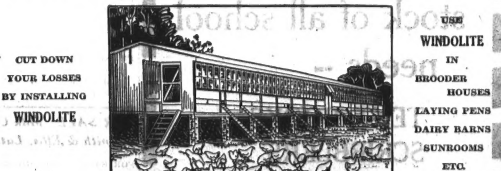

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, allows the full sunlight to enter, withstanding extreme changes in temperature, keeps out cold and wet, but glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER XXVI.—Continued.

"I don't want anything but a cup of tea, dearie, and maybe a slice of toast. I remember Edward here saying that old folks don't need much more than that. And—see here, childy—the doctor told me about your plan and everything. I guess he meant to help me, but I don't want to worry about it. I've always thought it would be kind of fun to live in a small house and it'll be right easy for you. I'll be easier for me, too, not to go over the stairs some night. Besides, I'll be able to see a half block farther down the street from that window! And it's going to be wonderful—having you home all day. You needn't worry a mite about how I'll take it, Charmin! Between you and me, dearie, I think it's going to be fun!"

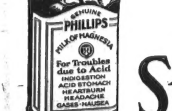

Only after the girl had turned away, undecided, and unable to speak at this display of bravery, did the old light tremble.

"Thank God that's over," murmured Grandma brokenly, while her big tears crept slowly down over her wrinkled cheeks.

CHAPTER XXVII

There were times during the days that followed when Charmin felt it difficult to believe that she and Grandma would ever leave the shelter of the homestead. They seldom talked about it, but when the impending changes could not be ignored, the old lady spoke cheerfully, stoically refusing assistance to leave that lay so near the surface. Only when she was alone did the fear show any of the dismay that flared her tired old heart. These were hard days for Grandma Davis.

"Beena somehow as if she'd grown smaller—drunk, you might say," commented Lizzie Baker to Saline Knowles. "It ain't easy to make changes at Grandma's age, and she's keepin' up before Charmin's more'n good for her. And I'm sorry for

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick correction is an alkali which neutralizes acid. The best corrector is Phillips' Milk of Magnesia. It has been standard standard for 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

Charmin, too. I don't ever see a young person that sat such over to anything else as she does at that old house. I declare, Saline, there's times when I wish whoever's happy it would be back out of the bargain."

But Miss Lizzie was not to get her wish. For the last day of the summer when George K. called Charmin as she passed the bank, and led her into the little room which had a formal "private" on the door, but which was in reality no more private than the air we breathe, because only on rare occasions did the president of the Wickfield National close his door. He closed it now, however, and said: "What you been up to this afternoon?"

Charmin smiled as she responded: "Why all this privacy? I've been to the bank. You ought to come down from this armful of books. But I got more than the books, Uncle George. I got a job! Miss Garfield has asked me to help at the library two hours each afternoon. Isn't that wonderful? I can easily leave Grandma that day or let Miss Lizzie come and sit with her; and it will bring in a little money. It was Grandma's idea. I'm going to stop at his office now and thank him for the job."

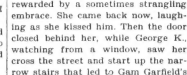

"Well, that's fine!" George K. spoke cheerfully. "I'll do you good to get away each day, and see folks. What I called you in for, Charmin, was to say that you can sign the deed at ten o'clock tomorrow. I just got word that your man will be here then, and wants to see you. I told him to come to the bank—thought maybe it would be hard for Grandma to see the act done, as you might say. I'm thankful now, child, that she deeded the place to you. It would be hard for her to come to the bank. There, Charmin, if you feel like crying, cry on my shoulder; but I advise you to buck up. In the long run most things come out right in this old world. If I didn't believe that I think I shouldn't be as happy as I am, or as fat, either."

"Or so helpful to the rest of us," added Charmin. "It's all right, Uncle George. I did my crying long ago, and have since acquired a stiff upper lip that it sometimes hurts! But as Grandma's prob'nly brought a great deal more, I don't complain. I'll be here at ten. Now I must run up and thank Sam Garfield for his suggestion, and then skip home. Thank you very much, Uncle George. Haven't you forgotten something?" asked George K. as she reached the door. Her eyes aglow with sudden merriment. This was an old joke of childhood's days, when as a little lass she often slipped into the room marked "Private." In search of the wee pink checkmarks which George K. used to tell her "grew in his pockets." If in those days, she forgot to bestow upon him a grateful kiss, he reminded her thusly and was rewarded by a sometimes strange embrace. She came back now, laughing as she kissed him. Then the door closed behind her, while George K., watching from a window, saw her cross the street and start up the narrow stairs that led to Sam Garfield's office in the building opposite.

"My Bill must have been crazy when he let that girl slip through his fingers," he complained to the four walls. "However, all's well that ends well, and I hope . . ."

What he hoped was interrupted by a knock. He opened the door, and there was every body's custom, walked in minus the formality of a knock. Charmin, finding Grandma busy with a client, delivered her thanks rapidly and moved on up Main Street with lagging feet. No need to tell Grandma that the dream day was at hand, she thought. Let her sleep in peace this last night under her own roof. As for herself, she must swallow that lump in her throat and remember, as George K. said, that things usually turn out all right. It was wonderful that she had needed help at the library last night. She must write Jim about it—it ever answered her that letter. Miss Lizzie's latest bulletin from Boston had brought news that he had "a

A pain in the lower part of your back can torture you. But not for long. You can get relief from Aspirin. These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headache, toothaches, and systemic pains of women. Relief comes promptly; is permanent. Get Aspirin today. It depresses the heart. Look for the Bayer cross, thus:

Perhaps he was too busy playing round with her to write to the girl he left behind him," thought Charmin wistfully, and, having reached the house, stopped to come at the carved pediment above the door.

"I hope they'll give it the coat of gold leaf it deserves," she said, and went inside, laid her books on the table by the door, and then stood still, staring into the room that had been a shop for almost as long as she remembered.

"Haven't you a word of greeting for the returned prodigal?" said Jim Bennett.

He arose from where he was sitting beside Grandma and caught Charmin's hands in both of his. "Steady!" he said. "Folks have been coming to expect of shock. I'd have wanted you to come to me. I started at a moment's notice. All right. Sit down, Charmin, and catch your breath."

Charmin bent her gently into the rocking chair, and drew up a straight-backed old Chippendale for himself. A sort of date Charmin heard of her grandmother say anxiously: "Hain't you better get a drink of water?" "And at that she laughed."

"I'm not faint," she protested, "merely struck dumb, as you might say, Jimmy, you look—well—"

"Different, doesn't he?" put in Grandma; and Charmin, noticing her for the first time since this amazing homecoming, saw that her sweet old face looked happier than it had for days. "He's got a sort of air about him," she was saying. "I saw it right off when he came in. He looks—stylish."

"Good!" breathed Jim. "You talk with my mouth before she fell in love with a fruit cake."

Charmin laughed, spontaneously, and Grandma asked: "You mean you're playing second fiddle these days?"

"Something mighty near it," grinned Jim. "Will you believe it, Grandma, my loving mother had noticed when I deserted. I left her sampling a new variety of citron. She says it's good to be home."

"Then you haven't fallen in love with—"

CO?

Will Sail For India

H-101 To Leave on Voyage Earlier

The anticipated date of the H-101, which recently completed her Canadian round trip, will leave for India nearly a month earlier than had been originally planned.

She will take the air days after September 18, and a few days later will end second on the first shipboard voyage to India en route to Ismailia, which is 10 miles from Cairo.

The date for the voyage has been advanced with the idea that it might be politically beneficial to divert the minds of the Indian people from some of their troubles.

Proposed round table conference, Earle arrangements serve also to demonstrate the faith of the industry in the future of the airship company.

In official circles, the voyage of the H-101 is regarded as an entirely successful experiment.

At least 20 mechanics and scientists have left Cambridge for Ismailia.

The H-101 differs in several respects from her predecessor. She is 743 feet long which is 43 feet more than the H-100, and has several additional features provided for safety on the voyage and comfort of the passengers.

One of the features will be a smoking compartment, provided with small smokers where passengers may get matches, tobacco and cigars.

On the H-100 model the use of the H-101, which is fitted with crude oil engines.

On the Indian voyage, she will be commanded by Flight-Lieutenant Irwin, and Major Scott will again be on board.

One lesson learned from the Atlantic flight, is that a new coating of "dope"—the special varnish used for strip and airplane fabrics—must be applied after the fabric has been put in place.

The H-100 before it makes another long flight will be fitted with new engines and new fabric.

Although there is considerable difference of opinion of the value of airships or blimps, the fact is that the air ministry is convinced of their utility and believes that in time they will form a regular means of transoceanic transport for passengers and mails.

Oriental Poppy

New Bomb Is Developed By Resident Of Duncan, B.C.

An Oriental poppy developed from a seedling by E. W. Neel, of Duncan, B.C., has been given an award of merit by the Royal Horticultural Society, and named the "Cochin" after the district in which it originated.

The large blooms grow from 10 to 12 inches, and are over 4 feet 6 inches. The color of the flower is dark red. The seedling appeared voluntarily in Mr. Neel's garden, and he developed it.

Strength Of Canadian Woods

Comparison Of Strength Of Sugar Maple and the Yellow Birch

A comparison of strength values of wood of sugar maple and yellow birch shows that the sugar maple is actually the stronger in the green condition, whereas after seasoning, they are of approximately the same strength.

This is revealed through publication of results of the physical and mechanical properties of Canadian woods by the Forest Research Laboratories of Canada, Department of the Interior.

A Corrector Of Unpleasant Troubles. Many testimonials could be presented showing the great efficacy of Dr. Williams' Pink Pills in correcting disorders of the respiratory system, and the fact that the pills are the only ones recommended by the medical profession.

But with haste that seemed to beat Grandma and the young man rather unexcitedly, Charmin slipped out, and was at the door when John Carter reached the steps. She did not guess that in the moment that followed, her nose would be in the light of the hall-way with fourteen of her fifteen steps. It is not known what she was aiming at.

New South Wales, Australia, has banned all curb gasoline pumps.

The Handy Bottle

Minard's is the more relief in the Handy Bottle. For strains, sprains, bruises, bumps and bites.

A Corrector Of Unpleasant Troubles. Many testimonials could be presented showing the great efficacy of Dr. Williams' Pink Pills in correcting disorders of the respiratory system, and the fact that the pills are the only ones recommended by the medical profession.

But with haste that seemed to beat Grandma and the young man rather unexcitedly, Charmin slipped out, and was at the door when John Carter reached the steps. She did not guess that in the moment that followed, her nose would be in the light of the hall-way with fourteen of her fifteen steps. It is not known what she was aiming at.

New South Wales, Australia, has banned all curb gasoline pumps.

CO?

Will Sail For India

H-101 To Leave on Voyage Earlier

The anticipated date of the H-101, which recently completed her Canadian round trip, will leave for India nearly a month earlier than had been originally planned.

She will take the air days after September 18, and a few days later will end second on the first shipboard voyage to India en route to Ismailia, which is 10 miles from Cairo.

The date for the voyage has been advanced with the idea that it might be politically beneficial to divert the minds of the Indian people from some of their troubles.

Proposed round table conference, Earle arrangements serve also to demonstrate the faith of the industry in the future of the airship company.

In official circles, the voyage of the H-101 is regarded as an entirely successful experiment.

At least 20 mechanics and scientists have left Cambridge for Ismailia.

The H-101 differs in several respects from her predecessor. She is 743 feet long which is 43 feet more than the H-100, and has several additional features provided for safety on the voyage and comfort of the passengers.

One of the features will be a smoking compartment, provided with small smokers where passengers may get matches, tobacco and cigars.

On the H-100 model the use of the H-101, which is fitted with crude oil engines.

On the Indian voyage, she will be commanded by Flight-Lieutenant Irwin, and Major Scott will again be on board.

One lesson learned from the Atlantic flight, is that a new coating of "dope"—the special varnish used for strip and airplane fabrics—must be applied after the fabric has been put in place.

The H-100 before it makes another long flight will be fitted with new engines and new fabric.

Although there is considerable difference of opinion of the value of airships or blimps, the fact is that the air ministry is convinced of their utility and believes that in time they will form a regular means of transoceanic transport for passengers and mails.

Oriental Poppy

New Bomb Is Developed By Resident Of Duncan, B.C.

An Oriental poppy developed from a seedling by E. W. Neel, of Duncan, B.C., has been given an award of merit by the Royal Horticultural Society, and named the "Cochin" after the district in which it originated.

The large blooms grow from 10 to 12 inches, and are over 4 feet 6 inches. The color of the flower is dark red. The seedling appeared voluntarily in Mr. Neel's garden, and he developed it.

Strength Of Canadian Woods

Comparison Of Strength Of Sugar Maple and the Yellow Birch

A comparison of strength values of wood of sugar maple and yellow birch shows that the sugar maple is actually the stronger in the green condition, whereas after seasoning, they are of approximately the same strength.

This is revealed through publication of results of the physical and mechanical properties of Canadian woods by the Forest Research Laboratories of Canada, Department of the Interior.

NEW ATTACHMENT FOR TRACTOR IS DEMONSTRATED

R. P. Currie and Dr. A. G. Scott are Chief Shareholders in Track Device for Wheel Tractor

A demonstration of a semi-caterpillar attachment for a wheel tractor was made on the farm of Tom Lawson, about twelve miles north of Hussar, last Wednesday, Aug. 27. The attachment is a caterpillar track that replaces the rear tractor wheels. The track carries the greater part of the weight of the machine, and its bearing surface of several square feet on the ground gives the machine greatly increased traction that enables it to work in soft ground or climb steep hills without slipping or digging the ground.

The demonstration at the Lawson farm proved the worth of the device. A McCormick-Husar tractor equipped with the track pulled a combine up the steep hills of the Lawson farm without difficulty. There was no slippage, and the tractor moved right along with its load on the soft ground of the wheat field. Last year the same tractor equipped with wheels failed to pull the same combine in the same field.

The demonstration was the first of its kind in Canada, and was put on under the supervision of R. P. Currie, of Bassano. P. Spooner, International Harvester Co. official, of Calgary attended the demonstration, and was greatly impressed with the possibilities of the device. A number of farmers and people from Hussar and Bassano also saw the demonstration.

The track attachment is made by the Moon Track Co., of Chicago, and the Canadian company is the Moon Track Co. of Canada. R. P. Currie and Dr. A. G. Scott are the chief shareholders in the Canadian company, which was recently organized. They plan to place the device on the Canadian market, and manufacture different models that will fit the most popular makes of wheel tractors in use today.

DR. SCOTT FLIES TO WINNIEPEG

Dr. A. G. Scott flew in his airplane to Winnipeg this week to attend the big medical conference in the Manitoba capital. He was accompanied by his son George, and Irvin Harker, air pilot.

The little silver winged monoplane took off on Wednesday. They expect to be back home this week-end.

Wedding

KANSTRUP-BRYSON

A quiet wedding was solemnized at Knox Church on Monday, Aug. 25, when Lillian Bryson became the bride of Nels Peter Kanstrup, both of Latham. Rev. F. C. McCrae was the officiating clergyman.

Following the wedding ceremony the happy couple left for a honeymoon trip through British Columbia.

Crawling Valley News

Mrs. J. W. Robbins left for Spokane Wash. on Monday where she will teach school.

Mr. and Mrs. W. R. Whitney made a trip to Dorothy on Saturday.

Mrs. Robson and Mrs. Robbins made a trip to Bassano last Wednesday, bringing Mrs. E. J. Currie and son home.

Christina Wight and Hazel Barlow of Bassano spent the week with Mrs. R. Robson.

Mr. and Mrs. D. L. Thompson and Mrs. C. H. Farnsworth are here from Spokane.

Margaret Ledrandeur was a visitor last week at the Thew home.

Mr. and Mrs. Blaine Squires entertained as dinner guests last Sunday Mr. and Mrs. E. K. McKinnay and Mrs. D. L. Thompson and daughters, and Mr. and Mrs. C. H. Farnsworth.

Le Ross returned from a trip to the States, bringing his son back with him.

Mrs. Robson, Trella Mae, Hazel Barlow and Christina Wight made a trip to Dorothy on Friday.
